

# FREEDOM

Wheelchair accessible toilet

It has the proper turning radius, hand rail positioning, tank height and other specific measurements for enhanced usability and total compliance. It also has a patented, flat ground-level entry that requires no ramp or special set-up and allows effortless entry and exit.

The Freedom 3 is constructed from rugged polyethylene with a double-walled front and hidden knuckle door hinge that supports the door without sagging. The roof has added thickness and a trap ridge that fits over the side walls to create an incredibly rigid unit. To aid in transporting, the roof has built-in channels to hold straps in position when transporting and multiple handles to aid in handling.

## Specifications:

Dimensions (HxWxD):	2,29m x 1,68m x 2,22m
Weight:	136 kg
Standard tank volume:	132 L

## Panel colours:

Dark Grey

Free with 28 800 ROI points
